PROFESSIONAL EXPERIENCE

Projects - Recruitment, Product & Operations

Apr 2024 - Aug 2026

- Completed a five-month technical recruitment engagement supporting Netcompany-Intrasoft, covering candidate sourcing, screening, assessment and pipeline coordination for technical and security-sensitive roles.
 - Built practical digital products and portfolio projects addressing Customer Success and operational challenges, including account-health dashboards, churn analysis and a rules-based job-search platform.
 - Expanded my technical capabilities through hands-on work with SQL, data analysis, workflow automation and AI tools, using them to streamline research, reporting and operational decision-making.
-

Evergrowth (SaaS | CRM Implementation | Business Operations)

Nov 2023 - Mar 2024

Senior Sales Operations Manager

- Managed operational delivery across 15 B2B client accounts, onboarding 4 within the first month and designing CRM workflows across Salesforce, HubSpot and Pipedrive. Reverse-engineered historical CRM and market data to define ICPs and develop data-led GTM strategies.
- Built lead-generation and CRM automation across Apollo, Outreach and Outplay, producing 500+ qualified leads and contributing to a 35% increase in conversion.
- Architected real-time Looker Studio dashboards, integrating CRM data through Zapier and Coupler.io to track pipeline, adoption, account health and churn risk; translated findings into executive business reviews and growth recommendations.
